## 3    **SEC. 101. FINDINGS AND PURPOSE.**

4            (a) FINDINGS.—Congress finds that—

5                    (1) approximately ½ of all individuals in the  
6            United States who suffer from blood-clotting dis-  
7            orders, such as hemophilia, were exposed, through  
8            the use of blood-clotting agents, to human  
9            immunodeficiency virus (HIV), which causes the  
10           fatal illness known as acquired immune deficiency  
11           syndrome (AIDS);

12                   (2) blood-clotting agents (called “antihemophilic  
13           factor”) used in the treatment of blood-clotting dis-  
14           orders, such as hemophilia, have been manufactured  
15           from the blood plasma of 1,000 to 20,000 (or more)

1 donors, placing persons with hemophilia at particu-  
2 larly high risk for HIV and other blood-borne dis-  
3 eases;

4 (3) the Centers for Disease Control, in a weekly  
5 morbidity and mortality report (MMWR) issued on  
6 July 16, 1982, first identified individuals with hemo-  
7 philia who had contracted illnesses now known to be  
8 associated with HIV infection and suggested the  
9 possible transmission of an infectious agent through  
10 blood-clotting agents;

11 (4) the National Blood Policy, published by the  
12 Secretary of Health, Education, and Welfare on Sep-  
13 tember 10, 1974, outlined the authority of the Fed-  
14 eral government, through the Public Health Service,  
15 to protect the safety of the blood supply and blood-  
16 clotting agents sold in this country and an imple-  
17 mentation plan to carry out this policy;

18 (5) the process by which antihemophilic factor  
19 is commercially manufactured, marketed, and sold  
20 for use by people with blood-clotting disorders, such  
21 as hemophilia, is governed by Federal regulations;

22 (6) in its review of the events surrounding the  
23 HIV infection of thousands of people with blood-clot-  
24 ting disorders, such as hemophilia, a 1995 study, en-  
25 titled “HIV and the Blood Supply”, of the Institute

1 of Medicine found “a failure of leadership and inad-  
2 equate institutional decision-making processes” in  
3 the system responsible for ensuring blood safety,  
4 concluding that “a failure of leadership led to less  
5 than effective donor screening, weak regulatory ac-  
6 tions and insufficient communication to patients  
7 about the risk of AIDS”;

8 (7) individuals with blood-clotting disorders,  
9 such as hemophilia, who have HIV infections incur  
10 annual medical costs that often exceed \$150,000 due  
11 to the expense of the necessary medications and the  
12 complications caused by the combination of the 2 ill-  
13 nesses;

14 (8) 26 other countries have established govern-  
15 ment compensation programs to assist individuals  
16 with blood-clotting disorders, such as hemophilia,  
17 who are infected with HIV;

18 (9) Ricky Ray was born with hemophilia and,  
19 like his 2 younger brothers and thousands of others,  
20 became infected with the deadly HIV through the  
21 use of contaminated blood-clotting products;

22 (10) Ricky Ray and his family have brought na-  
23 tional attention to the suffering of the individuals  
24 with blood-clotting disorders, such as hemophilia,

1 and their families who have been devastated by HIV;  
2 and

3 (11) Ricky Ray died at the age of 15 on De-  
4 cember 13, 1992, of hemophilia-associated AIDS  
5 and this Act should bear his name.

6 (b) PURPOSE.—It is the purpose of this title to estab-  
7 lish a procedure to make compassionate payments to indi-  
8 viduals who were infected with HIV after treatment, dur-  
9 ing the period beginning in 1982 and ending in 1987, with  
10 contaminated blood products.

11 **SEC. 102. RICKY RAY HEMOPHILIA RELIEF FUND.**

 3 period, investments of amounts in the Fund shall be liq-
